Hiring Manager,  
React.js Front-End Web Developer  
Turing  
1900 Embarcadero Rd  
Palo Alto, California US

Dear Hiring Manager,

I am writing to express my keen interest in the React.js Front-End Web Developer position at Turing, as advertised on LinkedIn.com. Although I am a fresher with no prior professional experience, I am enthusiastic about starting my career in web development and believe I possess the necessary skills and dedication to contribute to Turing's projects.

Throughout my academic journey, I have fostered an unwavering passion for front-end web development and dedicated myself to mastering various technologies and frameworks, with a particular focus on React.js. Through self-guided projects and coursework, I have gained a solid understanding of the fundamental concepts of React.js and its workflows.

As I approach the final year of my degree, I am eager to apply my limited but valuable professional experience and make a tangible impact within a team environment. Possessing a strong foundation in engineering and computer science, I am currently pursuing a bachelor's degree in computer science and engineering. My educational background has equipped me with essential skills such as problem-solving, analytical thinking, and adaptability to new technologies and challenges.

I am eager to apply my theoretical knowledge in a practical setting and contribute to Turing's mission of connecting world-class engineers with companies. As a quick learner with meticulous attention to detail, I am highly motivated to deliver exceptional results. I thrive in collaborative environments and am genuinely excited about working closely with experienced professionals to accelerate my professional growth and make meaningful contributions to the team. Furthermore, my excellent communication and interpersonal abilities enable effective collaboration and clear communication with team members and clients alike.

The opportunity to join Turing and learn from industry experts while making a substantial contribution genuinely excites me. I believe that my dedication, passion, and relentless pursuit of knowledge make me an ideal fit for this position.

Thank you for considering my application. Please find my attached resume for your review. I would welcome the opportunity to discuss how my skills and enthusiasm align with Turing's requirements in more detail. I am available for an interview at your convenience and would be grateful for the chance to further demonstrate my qualifications.

Thank you for your time and consideration.

Sincerely,

Muhammad Amzad Hosen
